Unique Design

The design is truly unique, allowing two units to seamlessly assemble into one simple and handy box. This ingenious feature not only makes it easy to handle but also enhances its portability significantly.

Measure UP

BY LEPTONS

OUR PRODUCT

A portable and user-friendly device that allows patients to accurately and independently measure their height. The device is simple to use and requires minimal training or assistance. Using ultrasonic technology, the device precisely measures the distance between the patient's head and the floor, which is then converted into an accurate height measurement. Our ultrasonic height measurement device eliminates the need for additional personnel, enabling healthcare providers to allocate their resources more effectively.

Measuring Device

Once you stand below it, It will measure your height

Wireless Display

This will show the measurement on your desk

3 easy steps

01. Switch ON the measuring device — ON

The machine will get the refferance

02. Switch ON the wireless display

03. Stand below the device

The device will take the measurement, and a buzzer will beep as an indication.
